Results-oriented Software Engineer and Team Lead with 8+ years of experience designing high-scale JVM applications and leading agile engineering teams.

Skills

Languages: Scala, Java, SQL, JavaScript

Frameworks & Libraries: Akka, Spark, Kafka, Flink, Play Framework, Spring Boot, React

Cloud & DevOps: GCP, Azure, AWS, Docker, Kubernetes, Terraform, Grafana, Git, Claude Code

Technical Leadership: Cross-Functional Alignment, Executive Stakeholder Management, Technical Translation, Mentorship & Code Reviews

Experience

A2X Accounting

Feb 2026 – Jul 2026

Technical Team Lead, Toronto, Ontario (Remote)

- Refactored legacy Java Amazon SP-API integrations on App Engine and Spanner to resolve tech debt
- Led technical planning and roadmapping, mentoring developers on clean code and best practices
- Hardened unstable beta features, reducing customer incident turnaround by 96%
- Enhanced system reliability by building GCP Monitoring dashboards and alerting for key features
- Championed Claude Code best practices when automating PRs, tickets, and system design docs

CNH Industrial

Mar 2023 – Feb 2026

Senior Software Developer, Toronto, Ontario (Remote)

- Architected robust, real-time telemetry pipelines processing 2B+ daily records using Scala, Spark, and Flink
- Optimized batch jobs and enhanced analytics workflows using Databricks notebooks
- Designed REST APIs and integrated enhanced engineering monitoring and dashboarding
- Extended the internal telemetry rules engine, enabling complex cross-domain query compositions
- Spearheaded Java/Spring Boot feature development enabling data import and export for users

DataPassports

Jul 2020 – Dec 2022

Senior Software Developer, Toronto, Ontario (Remote)

- Enhanced a Scala-based Spark application with a cross-functional team, improving performance and scalability
- Implemented a multi-stage Scala Spark pipeline integrating TensorFlow Java API for entity recognition
- Optimized API workflows with Kafka and Spark Streaming, achieving ~20x better processing performance
- Developed token-based authentication for Azure SQL using Azure Active Directory to improve security
- Partnered with leadership to define specs and deliver custom features for high-value enterprise clients

AwareAds

Jun 2019 – Jul 2020

Scala Developer, Toronto, Ontario

- Acted as the lead Scala developer of the Real-Time Bidding Platform (RTB)
- Conducted technical audits of core services to identify scaling bottlenecks and define roadmaps
- Redesigned and implemented all backend microservices using the Play Framework
- Built an AdExchange simulator for stress testing infrastructure and simulating the RTB environment
- Created testing suites using ScalaTest and custom scripts for data transformations

Publicis Sapient
Play Developer, Toronto, Ontario

Oct 2018 – Apr 2019

- Engineered features for Walmart.ca's checkout flow using Play Framework to enhance user experience
- Collaborated with a cross-functional team to integrate third-party services, ensuring seamless functionality
- Deployed and maintained services using Jenkins and Walmart internal tools, ensuring reliability
- Created automated test suites using ScalaTest and assisted in refactoring legacy codebase tests

AppDirect
Backend Software Developer, Montréal, Québec

Sep 2017 – Dec 2017

- Developed a new Scala-based microservice to handle communication with an external API
- Built scalable, fault-tolerant functionality using Akka, Akka-HTTP, Scalaz, and Play Framework
- Deployed the service into production incorporating ScalaTest suite and SaltStack using TeamCity

AppDirect
Frontend Software Developer, Montréal, Québec

Jan 2017 – Apr 2017

- Developed UI for the internal ticketing system using React, Redux, and Axios
- Created new suites of automated testing using Jest and Enzyme
- Integrated a Redis instance to store both temporary user data and asynchronous data

Sears Holdings Corp.
Software Engineer Intern, Hoffman Estates, Illinois

May 2016 – Aug 2016

- Worked with senior staff to design and architect a project tracking and management tool
- Spearheaded development of a web application using React.js and Node.js
- Integrated Bootstrap, Reflux, and Express into an ongoing project

Nokia
Software Designer, Ottawa, Ontario

Aug 2015 – Dec 2015

- Designed and built server-side functionality for enterprise software
- Implemented new features using Spring Framework, Jersey Framework, and Apache Commons
- Wrote logic for importing, parsing, manipulating, and exporting application data
- Developed a comprehensive list of JUnit tests to ensure product functionality

IBM Canada
Software Developer, Ottawa, Ontario

Jan 2015 – Apr 2015

- Collaborated with a team of 20-25 developers on enterprise software (Cognos TM1 Analytics)
- Implemented new frontend functionality using HTML, CSS, and jQuery for beta release
- Developed a suite of automated tests integrated with Jenkins and Selenium
- Assisted in the discovery, troubleshooting, and remediation of software bugs

Bell Canada
Technical Systems Integrator, Toronto, Ontario

May 2014 – Aug 2014

- Performed network data analysis and conducted laboratory routing experiments
- Collaborated with subject matter experts, network operations, and vendors to develop new services
- Certified carrier-grade routers and infrastructure for TCP/IP protocols (OSPF, BGP, MPLS, BFD, Multicast)

Education

BASc. Computer Engineering
University of Waterloo, Sep 2013 – Apr 2018

Waterloo, Ontario
