

Ariel Paulin

ariel.paulin@gmail.com | [linkedin.com/in/arielpaulin](https://www.linkedin.com/in/arielpaulin) | github.com/anpaulin

Experienced backend developer with 8+ years of post-graduation experience and excellent interpersonal and communication skills. Proven track record of breaking down, understanding, and modifying complex systems, communicating cross-functionally, and collaborating directly with internal and external stakeholders and clients.

Experience

Technical Team Lead | **A2X Accounting** | [Toronto, Ontario \(Remote\)](#) **Feb 2026 – Jul 2026**

- Partnered with customer success to refactor Amazon SP-API integrations, resolving critical billing bugs
- Led solution design and technical planning for core billing engines, defining architecture roadmaps
- Hardened core system features, reducing support ticket and customer incident turnaround by 96%
- Built GCP observability dashboards to monitor transaction health and resolve data anomalies
- Championed automated AI workflows with Claude Code to streamline system design docs and ticket creation

Senior Software Developer | **CNH Industrial** | [Toronto, Ontario \(Remote\)](#) **Mar 2023 – Feb 2026**

- Architected real-time telemetry pipelines processing 2B+ daily records using Scala, Spark, and Flink
- Optimized telemetry batch jobs and enhanced analytics workflows using Databricks notebooks
- Designed REST APIs and integrated real-time metrics tracking to enhance engineering monitoring and dashboarding
- Led Java/Spring Boot feature development enabling telemetry data import and export for clients
- Unified Machine Health parsing pipelines, reducing codebase overhead and adding text-value metrics monitoring

Senior Software Developer | **DataPassports** | [Toronto, Ontario \(Remote\)](#) **Jul 2020 – Dec 2022**

- Collaborated in a cross-functional team to enhance a Scala-based Spark application, improving scalability
- Designed a Scala/Spark pipeline integrating TensorFlow to automate PII entity recognition
- Optimized API integrations with Kafka, achieving 20x lower latency for client applications
- Secured database connections by implementing Azure Active Directory token-based authentication
- Partnered with enterprise clients to define specs and deliver custom data-privacy features

Scala Developer | **AwareAds** | [Toronto, Ontario](#) **Jun 2019 – Jul 2020**

- Acted as the lead Scala developer of the RTB platform, aligning system capabilities with client goals
- Conducted technical audits of core services to identify scaling bottlenecks and define system roadmaps
- Redesigned and implemented backend microservices using the Play Framework to improve ad traffic throughput
- Built an AdExchange simulator to stress-test RTB latency and demonstrate platform scale to partners
- Created automated testing suites with ScalaTest and data transformation scripts to verify data accuracy

Play Developer | **Publicis Sapient** | [Toronto, Ontario](#) **Oct 2018 – Apr 2019**

- Consulted for enterprise retail clients, developing core checkout features for Walmart.ca using Play Framework
- Collaborated with cross-functional client teams to design and integrate critical third-party vendor APIs
- Deployed microservices using Jenkins and built automated test suites to ensure integration stability
- Created automated test suites using ScalaTest and assisted in refactoring legacy codebase integrations

Skills

Solutions & Methods: API Integrations | Solution Design | Client Consulting | Technical Presentations

Languages: Scala | Java | SQL | JavaScript

Frameworks & Libraries: Akka | Spark | Kafka | Flink | Play Framework | Spring Boot

Cloud & DevOps: GCP | Azure | AWS | Docker | Kubernetes | Terraform | Grafana | Git | Claude Code

Soft Skills: Communication | Cross-Domain Collaboration | Interpersonal Relations | Stakeholder Relations

Education

University of Waterloo | **BASc. Computer Engineering** | [Sep 2013 – Apr 2018](#)

Waterloo, Ontario
