Email: ariel.paulin@gmail.com | LinkedIn: linkedin.com/in/arielpaulin | GitHub: github.com/anpaulin

Results-oriented Software Engineer and Team Lead with 8+ years of experience designing high-scale JVM applications and leading agile engineering teams.

Technical Skills

Languages: Scala, Java, SQL (Core), JavaScript (Supporting)

Technologies: Akka, Spark, Kafka, Flink, Play Framework, Spring Boot, React

Developer Tools: Claude Code (AI Dev Workflows), Git, IntelliJ, GCP, Azure

Experience

A2X Accounting, Toronto, Ontario (Remote)

Technical Team Lead, Feb 2026 – Jul 2026

- Refactored legacy Java Amazon SP-API integrations on App Engine and Spanner to resolve tech debt
- Led technical planning and roadmapping, mentoring developers on clean code and best practices
- Hardened unstable beta features, reducing customer incident turnaround by 96%
- Enhanced system reliability by building GCP Monitoring dashboards and alerting for key features
- Championed Claude Code best practices when automating PRs, tickets, and system design docs

CNH Industrial, Toronto, Ontario (Remote)

Senior Software Developer, Mar 2023 – Feb 2026

- Architected robust, real-time telemetry pipelines processing 2B+ daily records using Scala, Spark, and Flink
- Optimized batch jobs and enhanced analytics workflows using Databricks notebooks
- Designed and launched production REST APIs to deliver enriched telemetry data to consumers
- Spearheaded Java/Spring Boot feature development enabling data import and export for users

DataPassports, Toronto, Ontario (Remote)

Senior Software Developer, Jul 2020 – Dec 2022

- Enhanced a Scala-based Spark application with a cross-functional team, improving performance and scalability
- Implemented a multi-stage Scala Spark pipeline integrating TensorFlow Java API for entity recognition
- Optimized API workflows with Kafka and Spark Streaming, achieving ~20x better processing performance
- Developed token-based authentication for Azure SQL using Azure Active Directory to improve security
- Partnered with leadership to define specs and deliver custom features for high-value enterprise clients

AwareAds, Toronto, Ontario

Scala Developer, Jun 2019 – Jul 2020

- Acted as the lead Scala developer of the Real-Time Bidding Platform (RTB)
- Conducted technical audits of core services to identify scaling bottlenecks and define roadmaps
- Redesigned and implemented all backend microservices using the Play Framework
- Built an AdExchange simulator for stress testing infrastructure and simulating the RTB environment
- Engaged directly with stakeholders to define requirements and deliver custom solutions

Publicis Sapient, Toronto, Ontario

Play Developer, Oct 2018 – Apr 2019

- Engineered features for Walmart.ca's checkout flow using Play Framework to enhance user experience
- Collaborated with a cross-functional team to integrate third-party services, ensuring seamless functionality
- Deployed and maintained services using Jenkins and Walmart internal tools, ensuring reliability

AppDirect, Montréal, Québec

Software Developer, Jan 2017 – Apr 2017, Sep 2017 – Dec 2017

- Designed and implemented a Scala microservice to communicate with external APIs
- Built scalable, fault-tolerant functionality using Akka, Akka-HTTP, Scalaz, and Play Framework

Sears Holdings Corp. (Cart & Checkout Team), Hoffman Estates, Illinois

Software Engineer Intern, May 2016 – Aug 2016

- Worked with senior staff to design and architect a project tracking and management tool
- Spearheaded development of a web application using React.js and Node.js
- Integrated Bootstrap, Reflux, and Express into an ongoing project

Nokia, Ottawa, Ontario

Software Designer, Aug 2015 – Dec 2015

- Designed and built server-side functionality for enterprise software
- Implemented new features using Spring Framework, Jersey Framework, and Apache Commons
- Wrote logic for importing, parsing, manipulating, and exporting application data
- Developed a comprehensive list of JUnit tests to ensure product functionality

IBM Canada (Cognos TM1), Ottawa, Ontario

Software Developer, Jan 2015 – Apr 2015

- Collaborated with a team of 20-25 developers on enterprise software (Cognos TM1 Analytics)
- Implemented new frontend functionality using HTML, CSS, and jQuery for beta release
- Developed a suite of automated tests integrated with Jenkins and Selenium
- Assisted in the discovery, troubleshooting, and remediation of software bugs

Bell Canada (IP Innovations Lab), Toronto, Ontario

Technical Systems Integrator, May 2014 – Aug 2014

- Performed network data analysis and conducted laboratory routing experiments
- Collaborated with subject matter experts, network operations, and vendors to develop new services
- Certified carrier-grade routers and infrastructure for TCP/IP protocols (OSPF, BGP, MPLS, BFD, Multicast)

Education

BASc. Computer Engineering, Sep 2013 – Apr 2018

University of Waterloo, Waterloo, Ontario
