

Ariel Paulin

ariel.paulin@gmail.com | linkedin.com/in/arielpaulin | github.com/anpaulin

Results-oriented Software Engineer and Team Lead with 8+ years of experience designing high-scale JVM applications and leading agile engineering teams.

Technical Skills

Languages: Scala | Java | SQL (Core) | JavaScript (Supporting)

Technologies: Akka | Spark | Kafka | Flink | Play Framework | Spring Boot | React

Developer Tools: Claude Code (AI Dev Workflows) | Git | IntelliJ | GCP | Azure

Experience

Technical Team Lead

Feb 2026 – Jul 2026

A2X Accounting

Toronto, Ontario (Remote)

- Refactored legacy Java Amazon SP-API integrations on App Engine and Spanner to resolve tech debt
- Led technical planning and roadmapping, mentoring developers on clean code and best practices
- Hardened unstable beta features, reducing customer incident turnaround by 96%
- Enhanced system reliability by building GCP Monitoring dashboards and alerting for key features
- Championed Claude Code best practices when automating PRs, tickets, and system design docs

Senior Software Developer

Mar 2023 – Feb 2026

CNH Industrial

Toronto, Ontario (Remote)

- Architected robust, real-time telemetry pipelines processing 2B+ daily records using Scala, Spark, and Flink
- Optimized batch jobs and enhanced analytics workflows using Databricks notebooks
- Designed and launched production REST APIs to deliver enriched telemetry data to consumers
- Spearheaded Java/Spring Boot feature development enabling data import and export for users

Senior Software Developer

Jul 2020 – Dec 2022

DataPassports

Toronto, Ontario (Remote)

- Enhanced a Scala-based Spark application with a cross-functional team, improving performance and scalability
- Implemented a multi-stage Scala Spark pipeline integrating TensorFlow Java API for entity recognition
- Optimized API workflows with Kafka and Spark Streaming, achieving ~20x better processing performance
- Developed token-based authentication for Azure SQL using Azure Active Directory to improve security
- Partnered with leadership to define specs and deliver custom features for high-value enterprise clients

Scala Developer

Jun 2019 – Jul 2020

AwareAds

Toronto, Ontario

- Acted as the lead Scala developer of the Real-Time Bidding Platform (RTB)
- Conducted technical audits of core services to identify scaling bottlenecks and define roadmaps
- Redesigned and implemented all backend microservices using the Play Framework
- Built an AdExchange simulator for stress testing infrastructure and simulating the RTB environment
- Created testing suites using ScalaTest and custom scripts for data transformations

Play Developer

Oct 2018 – Apr 2019

Publicis Sapient

Toronto, Ontario

- Engineered features for Walmart.ca's checkout flow using Play Framework to enhance user experience
- Collaborated with a cross-functional team to integrate third-party services, ensuring seamless functionality
- Deployed services using Jenkins and built automated test suites with ScalaTest to replace legacy tests

Education

University of Waterloo

BASc. Computer Engineering

Waterloo, Ontario

Sep 2013 – Apr 2018
