Results-oriented Software Engineer and Team Lead with 8+ years of experience designing high-scale JVM applications and leading agile engineering teams.

Experience

Lead Software Engineer | A2X Accounting | [Toronto, Ontario \(Remote\)](#) **Feb 2026 – Jul 2026**

- Drove platform quality and stability improvements, enhancing end-user experience and accelerating customer issue resolution
- Refactored legacy Java Amazon SP-API integrations on App Engine and Spanner to resolve tech debt
- Hardened unstable beta features in production, reducing customer incident turnaround time by 96%
- Enhanced system reliability by building GCP Monitoring dashboards and alerting for key features
- Championed Claude Code best practices when automating PRs, tickets, and system design docs

Senior Forward Deployed Engineer | CNH Industrial | [Toronto, Ontario \(Remote\)](#) **Mar 2023 – Feb 2026**

- Architected real-time telemetry pipelines processing 2B+ daily records across global fleets using Scala, Spark, and Flink
- Deployed custom Databricks analytics notebooks and telemetry rules engine for cross-domain client queries
- Designed high-throughput REST APIs and integrated real-time engineering monitoring and dashboarding
- Extended the internal telemetry rules engine, enabling complex cross-domain query compositions
- Spearheaded Java/Spring Boot feature development enabling seamless enterprise client data import and export

Senior Forward Deployed Engineer | DataPassports | [Toronto, Ontario \(Remote\)](#) **Jul 2020 – Dec 2022**

- Partnered directly with enterprise customer leadership to define technical specs and deliver custom features
- Implemented a multi-stage Scala Spark pipeline integrating TensorFlow Java API for entity recognition
- Optimized API workflows with Kafka and Spark Streaming, achieving 20x better processing performance
- Developed token-based authentication for Azure SQL using Azure Active Directory to improve security
- Enhanced a Scala-based Spark application with a cross-functional team, improving performance and scalability

Lead Scala Developer | AwareAds | [Toronto, Ontario](#) **Jun 2019 – Jul 2020**

- Acted as the lead Scala developer of the Real-Time Bidding Platform (RTB) under strict latency SLAs
- Conducted technical audits of core services to identify scaling bottlenecks and define roadmaps
- Redesigned and implemented all backend microservices using the Play Framework
- Built an AdExchange simulator for stress testing infrastructure and simulating client RTB environments
- Created testing suites using ScalaTest and custom scripts for data transformations

Software Developer (Walmart.ca) | Publicis Sapient | [Toronto, Ontario](#) **Oct 2018 – Apr 2019**

- Forward-deployed on Walmart.ca checkout flow using Play Framework to enhance user experience
- Collaborated with cross-functional teams to integrate third-party enterprise vendor APIs and services
- Deployed and maintained production services using Jenkins and internal tools, maintaining high reliability
- Created automated test suites using ScalaTest and assisted in refactoring legacy codebase tests

Skills

Deployment & Integration: GCP | Azure | AWS | Docker | Kubernetes | Terraform | Databricks | REST APIs

Core Systems & Big Data: Scala | Java | Spark | Flink | Kafka | Akka | SQL | Spring Boot | Play Framework

Client & Technical Leadership: Forward Deployment | Enterprise Integration | Stakeholder Alignment | Technical Translation

Education

University of Waterloo | BAsC. Computer Engineering | [Sep 2013 – Apr 2018](#)

Waterloo, Ontario
